brilliant buses

low emissions

These stylish new buses we've introduced onto the streets of Winchester are British made in Scarborough, Yorkshire.

They use advanced technology to give a quieter, smoother ride, and the spacious interior has comfortable seats and large windows.

Ultra-efficient, lean-burn engines meet the latest stringent Euro 6 regulations, meaning drastically reduced emissions, especially important in a historic city like Winchester.

With their metallic paint finish in rich claret and champagne hues, we think you'll like the King's city buses.
